Proceedings recorded by computerized stenography, transcript  
produced by computer.

10:00:16 1 (Open Court)

10:00:16 2 THE COURT: We're here this morning on both of the  
10:00:21 3 Bandspeed cases, the 593 and the 771 cases. I called this  
10:00:28 4 conference because I had concern that some or many of you might  
10:00:33 5 be running a little short on your hourly billing requirements  
10:00:36 6 in your firm here at the end of the year. So this might be a  
10:00:40 7 good opportunity to give you a little bit more.

10:00:44 8 I have reviewed the status report in the 771 case and  
10:00:50 9 the amended report in the 593 case. And so really what I  
10:00:54 10 anticipate trying to do today is give you-all the direction  
10:01:03 11 that I'm going to take in this case.

10:01:05 12 Let me start and find out who is here. And I'll  
10:01:10 13 start with the plaintiffs. If you'll make announcement,  
10:01:13 14 please.

10:01:13 15 MR. GOODPASTOR: Good morning, Your Honor.  
10:01:15 16 Chris Goodpastor for Plaintiff Bandspeed, joined by Kurt Sauer.

10:01:23 17 MS. FROST: Good morning, Your Honor. Claudia Frost  
10:01:25 18 for CSR.

10:01:27 19 MR. WEAVER: Good morning, Your Honor. David Weaver  
10:01:29 20 on behalf Research in Motion.

10:01:31 21 MR. MITCHELL: Mark Mitchell and Bonnie Grant on  
10:01:34 22 behalf of the Motorola entities.

10:01:36 23 MS. ALQUIST: Good morning, Your Honor. Beth Alquist  
10:01:38 24 for Lego.

10:01:41 25 MR. WILLIAMS: Good morning, Your Honor. Roger

10:01:42 1 Williams on behalf of the Toshiba defendants.

10:01:46 2 MR. TERRAZAS: Good morning Your Honor,

10:01:47 3 Kevin Terrazas on behalf of Belkin.

10:01:50 4 MR. FINDLAY: Good morning, Your Honor. Eric Findlay  
10:01:52 5 on behalf of HTC.

10:01:53 6 MR. CRAFT: Good morning. Brian Craft. I'm here on  
10:01:55 7 behalf of the Acer entities.

10:01:57 8 MR. HORTON: Your Honor, Russ Horton along with  
10:01:59 9 Andrew Bramhall on been behalf of the Sony entities.

10:02:02 10 MR. BRAMHALL: Good morning, Your Honor.

10:02:03 11 MR. STEPHENS: Good morning, Your Honor.

10:02:03 12 Garland Stephens, here for LG today.

10:02:07 13 MR. O'BRIEN: Good morning, Your Honor. Dan O'Brien  
10:02:08 14 on behalf of Huawei.

10:02:09 15 MS. NAVA: Good morning, Your Honor. Brenna Nava on  
10:02:11 16 behalf of Parrot in the 593 and GN Netcom in the 791.

10:02:17 17 MR. NESTER: Good morning, Your Honor. Brian Nester  
10:02:19 18 on behalf of RIM.

10:02:21 19 MS. GRANT: I'm Bonnie Grant. My co-counsel Mark  
10:02:24 20 introduced me. I'm here for the Motorola defendants.

10:02:26 21 MR. WINGARD: Good morning, Your Honor.

10:02:27 22 Steve Wingard on behalf of Garmin.

10:02:32 23 MR. HEPTIG: Good morning, Your Honor. Pat Heptig  
10:02:33 24 for Plantronics.

10:02:33 25 MR. SIEBMAN: Good morning, Your Honor. Clyde

10:02:36 1 Siebman on behalf of Bluetooth.

10:02:37 2 MR. YORK: Good morning, Your Honor. Larry York for  
10:02:38 3 TomTom.

10:02:41 4 MR. ALLEN: And good morning, Your Honor.  
10:02:42 5 Stacy Allen for Lego.

10:02:43 6 THE COURT: All right. Well, thank you-all. And if  
10:02:45 7 any of you speak during the course of this conference, please  
10:02:49 8 again announce your name and who you represent when you get up  
10:02:52 9 to speak in order that the court reporter will be able to get  
10:02:56 10 that. She's really quick, but I'll bet she didn't hold all of  
10:03:00 11 your names firmly in her head for this.

10:03:03 12 This conference got a little bit easier with the  
10:03:13 13 settlement with Dell, because as many of you understood, I had  
10:03:17 14 a conflict with Dell that I was wrestling with how best to  
10:03:22 15 resolve it. And some of you may like what the solution was  
10:03:27 16 going to be or not the solution, but you were getting ready to  
10:03:31 17 get your Christmas present as a transfer to Judge Sparks's  
10:03:35 18 Court because I satisfied myself that it was an unwaivable  
10:03:39 19 conflict. Odd, but that's the way it was.

10:03:44 20 So those of you who wanted to go downstairs can be  
10:03:47 21 sad during the holidays, and those of you who didn't can be  
10:03:51 22 happy because, of all of the assembled other parties in this  
10:03:55 23 case, that was the only one I had a problem with.

10:03:57 24 I will tell you that I am leaning strongly toward the  
10:04:02 25 supplier-first option that was set forth in the status reports

10:04:07 1 that I received and reviewed. It seems to me that there is no  
10:04:11 2 perfect solution to resolve a case of this size. I am not as  
10:04:22 3 concerned as some of you were in your status reports about how  
10:04:26 4 long it may take to try if I were to just proceed ahead to try  
10:04:31 5 the case all at once.

10:04:33 6 Even though we have large dockets here, the way you  
10:04:39 7 handle -- or at least the way I believe that I handle large and  
10:04:44 8 complex cases is you just get started with them and you try  
10:04:48 9 them and you finish them. But I do think in this case a lot  
10:04:52 10 would be accomplished by determining the situation with regard  
10:04:57 11 to suppliers initially.

10:05:05 12 Now in our last conference, and as noted in the  
10:05:07 13 reports that you have filed, Dell had definitely indicated that  
10:05:13 14 it wanted to add another supplier to the case -- Broadcom. Let  
10:05:23 15 me ask the rest of you: Is there anyone else who desires to  
10:05:29 16 add any other parties to this case or anyone who does not  
10:05:39 17 believe that all of the appropriate parties that need to be in  
10:05:42 18 this case are in this case if we were to proceed with the  
10:05:50 19 supplier-first option?

10:05:54 20 Mr. Weaver?

10:05:56 21 MR. WEAVER: Your Honor, David Weaver on behalf of  
10:05:59 22 Research in Motion. As the case is currently postured,  
10:06:03 23 Your Honor, there is only one product for RIM that has been  
10:06:07 24 accused. It is the Pearl 8100. That product has only a CSR  
10:06:14 25 chip in it. So from RIM's perspective, as the case is

10:06:17 1 currently postured we would not need or desire to add in  
10:06:26 2 another chip manufacturer.

10:06:27 3           However, as the Court is fully aware from the status  
10:06:30 4 reports, both of them, Bandspeed intends to add in or has  
10:06:34 5 indicated that they do intend to add in numerous additional  
10:06:39 6 products. If that occurs, then RIM, and I think many of the  
10:06:43 7 other defendants in this room, would have additional chips that  
10:06:47 8 would be implicated. As it currently stands, Your Honor, I  
10:06:51 9 have no idea because, Bandspeed has not formally told us what  
10:06:56 10 additional RIM products they intend to add.

10:06:58 11           But at the very least, we anticipate that if this  
10:07:03 12 Court is inclined to allow them to add new products, that they  
10:07:06 13 would accuse products that would implicate TI-based chips. If  
10:07:14 14 that is the case, then RIM would intend to bring in that  
10:07:17 15 additional chip supplier, TI, or would at least finally be in a  
10:07:21 16 position where it could tender the defense of the case to that  
10:07:25 17 chip supplier. As it's currently postured, obviously,  
10:07:29 18 Your Honor, we can't tender a defense where a claim has not  
10:07:32 19 been asserted against one of those accused products.

10:07:37 20           I think there are other defendants in the room that  
10:07:39 21 would be in the same posture. Currently there's only a CSR  
10:07:41 22 chip that may be implicated. But if more products were  
10:07:44 23 accused, because they only have a single product accused, other  
10:07:48 24 chips would be indicated.

10:07:49 25           THE COURT: Thank you. Is there anyone that wants to

10:07:52 1 speak in addition or disagrees with the statements Mr. Weaver  
10:07:55 2 just made?

10:07:59 3 MR. STEPHENS: Your Honor, Garland Stephens for LG.

10:08:02 4 I don't disagree with anything Mr. Weaver said. I  
10:08:04 5 will point out that at least for LG, the products that are  
10:08:07 6 currently accused involve Broadcom chips. And we were  
10:08:11 7 expecting Broadcom to be impleaded by Dell. Since that has not  
10:08:15 8 happened, I have taken it up with my client whether they want  
10:08:18 9 to attempt to implead Broadcom themselves.

10:08:22 10 THE COURT: You have taken it up with your client?

10:08:26 11 MR. STEPHENS: I have. We haven't resolved yet how  
10:08:28 12 to accomplish that, but I have asked them about it. It's under  
10:08:32 13 consideration.

10:08:32 14 THE COURT: All right. Thank you. Anyone else from  
10:08:34 15 the defendant? Mr. Mitchell?

10:08:35 16 MR. MITCHELL: On behalf of the Motorola entities,  
10:08:39 17 Your Honor, we agree with Mr. Weaver's statement and are  
10:08:41 18 similarly situated and would be in a position, if additional  
10:08:46 19 accused products were added to the case to tender the defense  
10:08:48 20 to those chip manufacturers.

10:08:53 21 MR. BRAMHALL: Your Honor, Andrew Bramhall for the  
10:08:57 22 Sony defendants. We are in the first case, the 593 case, and  
10:09:01 23 we also have only CSR, or product with CSR chips at issue  
10:09:07 24 currently. So we also agree with Mr. Weaver's statements.

10:09:10 25 THE COURT: All right. If you agree, you don't have

10:09:12 1 to come tell me you agree. You're welcome to. I'm more  
10:09:16 2 interested right now knowing what you don't agree on than what  
10:09:19 3 you are going to agree on.

10:09:21 4 MR. WEAVER: Your Honor, people so seldom agree with  
10:09:23 5 me, I'm appreciating the reinforcement of that position.

10:09:26 6 THE COURT: Well, it is a holiday season.

10:09:29 7 MR. WEAVER: I understand.

10:09:29 8 THE COURT: You're entitled to that.

10:09:31 9 MR. TERRAZAS: Your Honor, Kevin Terrazas for the  
10:09:33 10 Belkin defendant. Your Honor, we agree with Mr. Stephens and  
10:09:35 11 LG. We have Broadcom chips. We are still ongoing in  
10:09:38 12 discussion with our client whether or not to try to implead  
10:09:41 13 Broadcom as well. But that's still an open issue for us.

10:09:47 14 THE COURT: All right.

10:09:49 15 Now, Mr. Goodpastor, Mr. Sauer, the 593 case has been  
10:10:02 16 around for a relatively long period of time. It's an '09 case  
10:10:12 17 that with filed in '09. I would have thought that I would have  
10:10:18 18 had more discussion from you-all with regard to what other  
10:10:22 19 products you might want to implead. I realize that we have  
10:10:28 20 been dealing with Markman and other matters, and then we had  
10:10:32 21 the transfer of this case down.

10:10:35 22 I would like to get at least the first stage of this  
10:10:40 23 case moving and done as quickly as possible. So let me hear  
10:10:46 24 from you-all on why it is important to identify further  
10:10:54 25 infringing products at this time, what it would accomplish, and

10:11:00 1 what would be the difference between having additional  
10:11:03 2 infringing products and additional chip manufacturers other  
10:11:09 3 than Broadcom in here instead of just proceeding ahead and  
10:11:18 4 allowing anyone who wants to bring Broadcom in to bring  
10:11:21 5 Broadcom in and proceeding with the product we have and seeing  
10:11:24 6 how that sorts itself out.

10:11:28 7 MR. GOODPASTOR: Your Honor, if I may address that  
10:11:30 8 Chris Goodpastor for Bandspeed.

10:11:33 9 We think it's important to bring in additional  
10:11:36 10 products to avoid an argument by defendants that by not  
10:11:41 11 bringing additional products in this suit regarding these  
10:11:43 12 patents we somehow waived the right to do that in the future.  
10:11:47 13 And, therefore, to avoid that argument -- we're not saying we  
10:11:49 14 necessarily agree with that. But to avoid that argument, we  
10:11:52 15 think it's important to do it.

10:11:53 16 Typically what happens in a case like this, you'll  
10:11:58 17 take some discovery on reasonably similar products and you get  
10:12:03 18 that discovery back. And after you have that discovery, then  
10:12:05 19 you have a deadline to add the other reasonably similar  
10:12:08 20 products that are related to the patent that are infringing.

10:12:11 21 We haven't had that opportunity for discovery in this  
10:12:13 22 case. We've had a little opportunity for discovery in the 771  
10:12:17 23 case. But most of the defendants have taken the position that  
10:12:20 24 they're not going to answer that discovery given the current  
10:12:24 25 state of pleadings.

10:12:25 1 So what we've decided to do is add products based  
10:12:30 2 upon information that we've be able to, after extensive  
10:12:35 3 analysis, glean from the third party and possibly from  
10:12:39 4 Defendants and use that information to add some additional  
10:12:41 5 products, knowing that we're going to have to take additional  
10:12:44 6 discovery and that product list based on that discovery may  
10:12:47 7 change.

10:12:48 8 However, based on the additional analysis -- and it's  
10:12:52 9 been fairly extensive -- we believe that we can be in a  
10:12:57 10 position to file an amended compliant with additional products  
10:13:00 11 by these defendants within a week's time.

10:13:02 12 So it's important to note the reason why we want to  
10:13:07 13 do that and how we're going to go about it and that -- and the  
10:13:11 14 fact that that product list may change. But it's also  
10:13:14 15 important to note two issues with respect to Defendants' plans  
10:13:18 16 or at least options to implead certain IC makers in this case.

10:13:22 17 The issues are twofold: One is, if the defendants  
10:13:26 18 add the IC makers, it is unclear to us at this point -- and  
10:13:33 19 maybe this won't be an issue -- but it's unclear to us at this  
10:13:35 20 point whether those IC makers will actually assert a  
10:13:38 21 declaratory judgment action against Bandspeed and whether  
10:13:42 22 without that declaratory judgment action Bandspeed will be  
10:13:46 23 required to assert counterclaims for infringement against those  
10:13:50 24 IC makers.

10:13:51 25 Two, if they do in any respect -- even if they don't

10:13:55 1 actually -- in all respect, Bandspeed is going to need  
10:13:58 2 additional discovery against and from the IC makers for the  
10:14:04 3 same reasons we told you over a year ago we needed additional  
10:14:07 4 discovery to assert the claims against CSR when they sought to  
10:14:11 5 intervene.

10:14:12 6 We'll need the additional discovery to assert the  
10:14:14 7 claims, and we'll definitely need the additional discovery to  
10:14:19 8 assert the infringement contentions against the IC makers.  
10:14:23 9 Because of the nature of the product and that -- we detailed  
10:14:26 10 that in response to the motion to intervene by CSR several  
10:14:31 11 months back.

10:14:32 12 So I wanted to make the Court aware of all of those  
10:14:35 13 separate issues regarding the potential impleader of the  
10:14:39 14 defendants. But to answer your question simply, Your Honor, we  
10:14:41 15 can be ready with a new amended complaint with some new  
10:14:45 16 products that are subject to confirmation and possibly change  
10:14:48 17 after discovery within about a week's time from today.

10:14:51 18 THE COURT: Let me ask you a question: You are  
10:14:54 19 familiar, of course, with the proposed dates and schedule that  
10:15:01 20 was in the joint status report in the 771 case?

10:15:05 21 MR. GOODPASTOR: Yes, Your Honor. And we came today  
10:15:07 22 armed with some revisions to both the proposed schedules  
10:15:13 23 depending on whether we had a trial with only current  
10:15:15 24 defendants or we actually brought in the IC makers. And I  
10:15:18 25 could hand those to the clerk, if you want.

10:15:20 1 THE COURT: Have you had occasion to circulate those  
10:15:23 2 to the other parties in this case?

10:15:24 3 MR. GOODPASTOR: We have not, Your Honor. We just  
10:15:27 4 finalized them this morning. And I brought extra copies that  
10:15:32 5 are circulating now. But, essentially, there are two versions  
10:15:36 6 of this. One version has a scheduling order with the current  
10:15:40 7 parties only, assuming there aren't going to be any new  
10:15:43 8 IC makers impleaded. And the other one is a revised version of  
10:15:47 9 the other scheduling order, assuming that additional IC makers  
10:15:53 10 will be impleaded as part of the case.

10:15:55 11 And essentially, Your Honor, the difference is the  
10:15:57 12 need for further discovery and give the additional IC makers  
10:16:01 13 time to enter the case, determine what their response is going  
10:16:05 14 to be, and make sure that everybody has time to do those type  
10:16:08 15 of things before we start that discovery.

10:16:12 16 But with respect to the scheduling order for the  
10:16:14 17 current parties only, Your Honor, it basically just moves most  
10:16:17 18 of the dates back a few months.

10:16:19 19 THE COURT: Well, don't spend a whole lot of time on  
10:16:22 20 that, because what I believe I've heard from several of these  
10:16:26 21 people today is that there -- is that there is at least a  
10:16:29 22 strong chance we're not going to proceed with the current  
10:16:33 23 parties only. But there is at least talk underway about  
10:16:38 24 impleading other parties. What I want to get to is a situation  
10:16:43 25 where we know if there are going to be other parties and get

10:16:51 1 them in here and then get this case moving along.

10:16:54 2 I did see Judge Ward the other day, and I thanked him  
10:16:58 3 for sending his case down. He apprised me that he bestowed  
10:17:04 4 several of those going-away presents on district judges around  
10:17:12 5 the state and the country and he was pleased to leave it behind  
10:17:15 6 him.

10:17:15 7 So if we're looking at -- let me initially, I guess,  
10:17:22 8 address this to, well, all of you. If the -- the first step is  
10:17:34 9 for you to file an amended pleading that adds the new products  
10:17:41 10 you desire to add, then there probably should be some time for  
10:17:48 11 the defendants to review that pleading and determine whether  
10:17:55 12 they're going to implead other chip suppliers.

10:17:58 13 MR. GOODPASTOR: We agree, Your Honor. And the --  
10:18:01 14 its title -- it's the Excel spreadsheet here.

10:18:04 15 THE COURT: Yeah. I know. I see that.

10:18:08 16 MR. GOODPASTOR: And the schedule we've set up is  
10:18:10 17 basically a week after you issue your scheduling order, we'll  
10:18:13 18 file our motion for leave to amend. And then 14 days after the  
10:18:17 19 order on the motion for leave to amend, if a motion is  
10:18:20 20 required -- assume that you require a motion for leave instead  
10:18:23 21 of just granting us leave, they would have 14 days to bring in  
10:18:27 22 whomever they desire. And we think with the products  
10:18:30 23 identified in the amended complaint, that would be plenty of  
10:18:34 24 time to identify who is the chip supplier and determine whether  
10:18:38 25 they want to bring them in.

10:18:42 1 THE COURT: All right. Y'all have now had a chance  
10:18:45 2 to look at this proposal on the plaintiff's part. It's fairly  
10:18:55 3 similar to what was in the proposed order. It was just that  
10:19:03 4 you're not my only case, and I couldn't get to you by early  
10:19:06 5 October when I got this scheduling order back.

10:19:13 6 Mr. Weaver, you rise?

10:19:15 7 MR. WEAVER: Yes, Your Honor. Let me address a  
10:19:17 8 couple of things. I have had an opportunity to review their  
10:19:20 9 proposal, which is similar to what was in the original joint  
10:19:24 10 status report. I guess a couple of comments: One is certainly  
10:19:31 11 I welcome the one-week deadline within which to file an amended  
10:19:34 12 complaint naming the accused products. I'm a little concerned  
10:19:39 13 with the vagueness that Mr. Goodpastor suggested about what new  
10:19:46 14 products would be in there and then the potential for  
10:19:49 15 additional new products downstream, et cetera.

10:19:53 16 THE COURT: Here's what we need -- Mr. Goodpastor,  
10:19:55 17 you need to get this. I do not want to do something as this  
10:19:59 18 case sits right now and then get down the line on it and we  
10:20:03 19 have a whole bunch of new products after that and the case gets  
10:20:06 20 bigger and bigger and bigger without resolution because of  
10:20:12 21 products being added and added and added.

10:20:14 22 I want to find out from you-all -- and I expect you  
10:20:19 23 as the professionals you are, because you know this case better  
10:20:22 24 than I -- what it is going to take to package this case up so I  
10:20:29 25 are can render scheduling order and we can get it finished. I

10:20:33 1 will tell you again, I don't care how long it takes to try.  
10:20:35 2 I'm not going to be worried about that. If it takes two months  
10:20:38 3 to try, I will just have to explain that to all of the other  
10:20:45 4 lawyers who are desiring to do things in my Court.

10:20:48 5 It's clearly going to take over a year. We're going  
10:20:55 6 to be in the new courthouse in a year, and that gives me a lot  
10:20:59 7 of flexibility I haven't had before in that I have other  
10:21:00 8 courtrooms. And if I need to bring in a visiting judge to try  
10:21:02 9 your case or other cases, I'll be able to do that when we get  
10:21:10 10 moved. But what I want and what I'm trying to accomplish with  
10:21:12 11 you-all is to get the vagueness out of here.

10:21:15 12 You have done what I asked, and I appreciate that in  
10:21:18 13 that I have the status reports. There have been some cases  
10:21:20 14 that have been settled out. But I don't want to keep moving  
10:21:27 15 this down with unknown factors in it that could change.

10:21:29 16 So Mr. Weaver, you can stay there. Mr. Goodpastor,  
10:21:36 17 you can address that. I want to get a point where we have all  
10:21:39 18 of the products and all of the parties and we have a schedule.

10:21:49 19 MR. WEAVER: Your Honor, if I might, one thing that  
10:21:51 20 could actually short-circuit this: There is a very narrow and  
10:21:55 21 limited universe of chip supplies for potentially similar  
10:22:00 22 chips. Mr. Goodpastor knows that list quite well in addition  
10:22:02 23 to CSR. One of the fastest way to expedite this process would  
10:22:07 24 frankly be for them to sue the chip suppliers directly. He can  
10:22:12 25 file suit against TI, against Broadcom. In fact, he said in

10:22:16 1 his joint status report that one of his concerns with the  
10:22:19 2 CSR-only trial that was proposed in the 593 case was that he'd  
10:22:23 3 have to file a second trial against Broadcom directly. So he  
10:22:27 4 clearly understands that he's capable of doing that.

10:22:30 5 If we brought in simply TI through the amended  
10:22:33 6 complaint, Broadcom, Qualcomm -- and I don't remember. I think  
10:22:38 7 there's one other that may be implicated -- that gets all the  
10:22:42 8 parties before Your Honor immediately without the need to go  
10:22:46 9 through an impleading process, which as Your Honor will no  
10:22:50 10 doubt appreciate, some suppliers may grudgingly object to being  
10:22:56 11 added into a suit by one of their customers and we may have a  
10:23:03 12 whole briefing cycle go on with that.

10:23:05 13 So just for Your Honor to consider.

10:23:08 14 MR. GOODPASTOR: If I may address that, Your Honor?

10:23:10 15 THE COURT: You may, Mr. Goodpastor.

10:23:13 16 MR. GOODPASTOR: I don't believe this is something  
10:23:15 17 Mr. Weaver participated in. But the reason we can't bring in  
10:23:18 18 the IC makers other than CSR at this point are all those  
10:23:21 19 reasons we discussed in response to the CSR motion to  
10:23:24 20 intervene. And, therefore, we believe if the additional  
10:23:28 21 IC maker is going to be brought in, they're going to have to be  
10:23:31 22 brought in by defendants in this case.

10:23:33 23 We can add in, you know, a week's time after the  
10:23:36 24 scheduling order a fairly broad set of products based upon our  
10:23:41 25 analysis of some information that we've received. It's

10:23:45 1 probably -- I would say it's likely -- I can't guarantee it, I  
10:23:48 2 would say it's likely that that broad list of products will  
10:23:51 3 address most of the chip manufacturers. I can't guarantee  
10:23:55 4 that, though.

10:23:56 5           What we will likely do after that point, after  
10:23:59 6 getting some discovery, is if we add new products, it will  
10:24:03 7 likely just be new products that are introduced after that  
10:24:06 8 point for the most part. We will want to take discovery,  
10:24:10 9 though, to confirm our product list. And one way to do that  
10:24:14 10 and do it quickly is to, as soon as the discovery stay is  
10:24:17 11 lifted, allow us to take discovery on reasonably similar  
10:24:21 12 products either through interrogatories or other means and just  
10:24:25 13 get that list from defendants. They know what the products  
10:24:29 14 are. We get that list from defendants, and then if there is  
10:24:32 15 anything additional to add other than new products that are  
10:24:35 16 coming out, we'll add them at that time. And that would get us  
10:24:38 17 to a point where we could be fairly certain we've got all the  
10:24:40 18 products in a pretty short amount of time.

10:24:42 19           Like I said, though, we're going to add a fairly  
10:24:44 20 broad array of products in the amended complaint, and I hope  
10:24:48 21 that that will address all of the potential impleading issues  
10:24:52 22 with respect to the IC makers.

10:24:55 23           THE COURT: Mr. Weaver or anyone else?

10:24:58 24           MR. WEAVER: Your Honor, again, getting that clarity  
10:25:02 25 soon is what is critical here. If they are going to be allowed

10:25:06 1 to add new products, getting a date certain for when those are  
10:25:10 2 going to be added into the case. I was not in the 593 case,  
10:25:15 3 Your Honor, and I'm not aware of all of the details as to why  
10:25:18 4 Mr. Goodpastor says he can't accuse the chip manufacturers  
10:25:22 5 themselves. The fact of the matter is I think he can. He  
10:25:25 6 can -- he's got all of information from RIM on their products.

10:25:28 7 THE COURT: Well, I can't resolve that here today.  
10:25:30 8 He says he can't. You say he can. Ms. Frost is here because  
10:25:35 9 she intervened. Her manufacturer in here. So there are ways  
10:25:40 10 to do it. I'm not going to let another two or three months go  
10:25:43 11 by while we figure out who can bring in who. You know, it's --  
10:25:47 12 we're at the time that we need to get this thing started one  
10:25:53 13 way or the other.

10:26:00 14 Now, if I were to look at the proposal by  
10:26:09 15 Mr. Goodpastor, he says he can amend his complaint within a  
10:26:15 16 week. So he suggests two weeks after that, for any defendant  
10:26:28 17 to file any additional pleadings to bring in any chip supplier.

10:26:34 18 It's not a mystery to anyone that I have been  
10:26:40 19 considering the supplier-first option, at least since our last  
10:26:44 20 conference on this. So the parties ought to be close enough to  
10:26:50 21 where that's three weeks to decide whether you're going to  
10:26:56 22 bring in the chip suppliers and to file an amended pleading in  
10:27:04 23 that regard. Tell me, Defendants, about that. I'm sure I'm  
10:27:16 24 going to hear from somebody that you can't do it.

10:27:18 25 MR. WEAVER: Your Honor, what I'm hearing from folks

10:27:21 1 around the room is that, as we proposed in our original  
10:27:24 2 schedule to the Court in the status conference, was 30 days was  
10:27:28 3 about what we thought was the fastest time from once we get the  
10:27:33 4 list of accused products from Mr. Goodpastor, to go through,  
10:27:39 5 identify which chips belong to which chip manufacturers in  
10:27:42 6 those products, and then go through, find those contracts, and  
10:27:46 7 then tender the defense and prepare the pleadings and try to  
10:27:50 8 either bring them voluntarily or through cross-claim.

10:27:53 9 I think 30 days was what we thought was a reasonable  
10:27:56 10 period of time from the point at which we get that list from  
10:28:01 11 Bandspeed. And I don't know if others have a --

10:28:06 12 THE COURT: Do you still belief that? Just tell me  
10:28:08 13 if somebody thinks 30 days is not reasonable.

10:28:13 14 By your silence -- well, one rises. A little slow  
10:28:16 15 there.

10:28:19 16 MR. FINDLAY: I apologize. Eric Findlay for HTC.  
10:28:22 17 Once we know exactly what is in the case by an amended  
10:28:27 18 complaint, I don't think 30 days is necessarily too quick. But  
10:28:30 19 I think I can speak for my client and maybe others that I'm a  
10:28:34 20 little concerned that we're skipping the step of their having  
10:28:38 21 to move and hopefully seek leave from Your Honor to do this.

10:28:41 22 I think there are defendants who, while they would --  
10:28:46 23 Plaintiff's may argue the case is early, I think there are  
10:28:49 24 defendants who would want the ability, at least for the record,  
10:28:52 25 Your Honor, to be able to argue strenuously to you that they

10:28:55 1 should not be allowed to add certain products to the case at  
10:28:58 2 this time. And I would like to see that at least baked into  
10:29:01 3 the schedule so we have the ability to do that if we deem it  
10:29:04 4 appropriate.

10:29:05 5 THE COURT: Well, see, what that argument does to me  
10:29:06 6 is make me want to go back and go ahead and try the 593 case  
10:29:11 7 and not try to do this what I thought was an easy way now,  
10:29:16 8 because now it's not getting to be the easy way. And that's  
10:29:19 9 the problem I get into with a big case. I'm looking for the  
10:29:22 10 best way to resolve this. And every time I build in other  
10:29:27 11 things to allow you-all to plead, you're going to do it,  
10:29:31 12 whether it's well-taken or whether you think it's well-taken or  
10:29:34 13 not.

10:29:35 14 And I hate to be harsh, but I see a lot of frivolous  
10:29:38 15 things in big cases just because lawyers want to put it on the  
10:29:42 16 record. I find that it very seldom gets considered by the  
10:29:45 17 Federal Circuit, but it takes a long time in this Court. So if  
10:29:50 18 I need to go back and not consider the supplier-first option,  
10:29:55 19 and put the 771 case on a different schedule and go ahead and  
10:29:59 20 schedule the 593 case, then I'm prepared to do that.

10:30:06 21 I don't think that's the best way to do it, but I'm  
10:30:09 22 not going to sit here and have us go, "Then we want to file  
10:30:12 23 this motion, then we want to file that motion, then we want to  
10:30:16 24 file the other motion."

10:30:18 25 I don't care what your clients think. Let me tell

10:30:22 1 you this. I think -- and tell your general counsels that, and  
10:30:25 2 you can tell your presidents that.

10:30:27 3 MR. FINDLAY: Yes, Your Honor.

10:30:27 4 THE COURT: The most expeditious way to do this is to  
10:30:30 5 forget about who can out-plead one another, tee this thing up  
10:30:34 6 the most expeditious way to get the issues before the Court,  
10:30:40 7 and to quit worrying about the procedures to get it done and  
10:30:44 8 get it tried. That will save your clients a lot of money in  
10:30:47 9 the long run.

10:30:49 10 MR. FINDLAY: Your Honor, I understand. I agree  
10:30:50 11 completely. But the only point I was trying to make is by the  
10:30:53 12 proposal that Counsel had given to us, it appeared he was  
10:30:59 13 contemplating the motion for leave to do this. And all I was  
10:31:02 14 suggesting, Your Honor, respectfully, is that if that is the  
10:31:06 15 course that is taken, that we have the ability to respond to  
10:31:08 16 that. And we can do so on an expedited basis, if that's what  
10:31:13 17 the Court would want us to do, not anything that would slow  
10:31:16 18 down or further stall the case from moving forward, Your Honor.

10:31:19 19 THE COURT: Well, I'm not -- I can decide the  
10:31:23 20 question of whether I'm going to grant that leave today. If  
10:31:29 21 we're going to have additional infringing product to get this  
10:31:33 22 case to conclusion, then I can tell you I'm not going to deny  
10:31:37 23 leave to bring them in. We get them in and we get it tried and  
10:31:42 24 that's the way it is.

10:31:48 25 You know, I don't care -- they don't have to file

10:31:50 1 leave to amend. That's why we're having this conference. You  
10:31:53 2 wouldn't have to file a leave to amend to implead chip  
10:31:56 3 suppliers after the fact. Both of these cases have been  
10:31:59 4 kicking around a while, one in the Eastern District and one  
10:32:02 5 here.

10:32:05 6 So that's what I'm looking at, is to get from you-all  
10:32:08 7 as lawyers, as the professionals you are, the most expeditious  
10:32:13 8 way to get this case to conclusion. And it's not by arguing  
10:32:17 9 over every little nuance that any lawyer can come up with in  
10:32:22 10 the pleadings.

10:32:23 11 I am here every day. There is just a limited number  
10:32:29 12 of hours in the day. So I would like to do this an easier way  
10:32:32 13 that is cheaper for your clients. But if I can't get agreement  
10:32:37 14 out of you how to do that, then we will do it how I find it  
10:32:42 15 most expeditious and we will work through it.

10:32:44 16 And if it is involved with trying the same case  
10:32:47 17 twice, I will try the same case twice. I don't think it's the  
10:32:50 18 best way to do it.

10:32:52 19 MR. FINDLAY: I agree with that conclusion,  
10:32:53 20 Your Honor. Thank you.

10:32:54 21 THE COURT: Ms. Frost?

10:32:55 22 MS. FROST: Good morning, Your Honor. I'm going to  
10:33:02 23 try to see if I can talk about a couple of things that I think  
10:33:05 24 will help clarify the situation for the Court and one that  
10:33:08 25 hasn't been discussed yet.

10:33:10 1           There are two issues as we see it, and we agree  
10:33:16 2 completely with the Court's aspirations to try to get this case  
10:33:21 3 resolved as expeditiously as possible. Obviously, CSR  
10:33:27 4 intervened two years ago with that in mind, to try to vindicate  
10:33:31 5 its clients, its customers' products, and its own. So it is  
10:33:34 6 totally consummate with our view that we want the case tried  
10:33:37 7 quickly and efficiently.

10:33:39 8           The chip supplier option is obviously one that we  
10:33:43 9 endorsed, and we suggested it to you and it's been suggested in  
10:33:47 10 the status reports from us as well. We think from a legal and  
10:33:51 11 a procedural and practical standpoint, it is the best way to  
10:33:55 12 go. There is a problem incident in it, though, that hasn't  
10:33:59 13 been raised with the Court that I think needs to be raised  
10:34:03 14 right now in order to put all the issues out on the table.

10:34:07 15           Putting to the side the second issue, which is delay,  
10:34:10 16 there will be delay -- I think a substantial amount of delay --  
10:34:15 17 from the parties who are similarly situated to CSR, Broadcom  
10:34:19 18 and others, who have not been in this case. There have been  
10:34:23 19 Broadcom products, by the way, that have been accused since  
10:34:27 20 2009. And unlike CSR, those chip makers have not attempted to  
10:34:33 21 intervene. Their particular customers have not impleaded  
10:34:36 22 them. And so I can think one can assume that they will resist  
10:34:42 23 any effort to be drawn into this controversy now.

10:34:45 24           So there will be some Rule 12 practice and other  
10:34:48 25 things that will of necessity cause delay in addition to those

10:34:53 1 things that Mr. Goodpastor himself has acknowledged and that  
10:34:55 2 you're gathering from some of the discussions you're hearing  
10:34:59 3 from the customer defendants. But there is this other problem,  
10:35:02 4 and this other problem is joinder.

10:35:04 5 And there is a big problem with regard to joinder, in  
10:35:07 6 fact. And I've got -- I've cited a case in the joint status  
10:35:11 7 report for the 593 case called *Rudd*. And *Rudd* was the case  
10:35:18 8 cited by -- in the legislative history from the -- of the  
10:35:22 9 America Invents Acts. And *Rudd* states -- is acknowledged to  
10:35:27 10 state the majority view of joinder issues. And *Rudd* cites a  
10:35:33 11 whole string of cases under Rule 20 that talk about the  
10:35:37 12 impropriety of joinder of competing manufacturers when the only  
10:35:44 13 common issue is the allegation that both of those competing  
10:35:48 14 manufacturers have infringed claims of the same patent.

10:35:53 15 I brought a couple of other cases with me today that  
10:35:59 16 I thought I'd hand up to Your Honor and, of course, share with  
10:36:03 17 opposing counsel. These are cases cited in -- cited in *Rudd*.  
10:36:14 18 *Spread Spectrum*, *Androphy*, and *Billups* are the three cases.  
10:36:18 19 And I think *Spread Spectrum* says it to me best, anyway, in the  
10:36:23 20 *Spread* -- except I can't say the two words without stuttering.

10:36:27 21 In the *Spread Spectrum* case, both Kodak and  
10:36:33 22 Heidelberg were alleged to infringe the same patent by the  
10:36:37 23 plaintiff. And Heidelberg and Kodak were competitors. The  
10:36:45 24 Court considered the motion to sever under Rule 21 based on  
10:36:53 25 improper joinder and granted it and stated the following:

10:36:58 1 Although Kodak and Heidelberg have both allegedly  
10:37:02 2 infringed the '623 patent, this does not conclusively establish  
10:37:06 3 that the actions arise from a common transaction or occurrence,  
10:37:09 4 which of course we know is a requirement of Rule 20. In fact,  
10:37:12 5 joinder is often improper where two competing businesses have  
10:37:16 6 allegedly infringed the same patent by selling different  
10:37:20 7 products.

10:37:20 8 In the instant case, the causes of action against  
10:37:25 9 Kodak and Heidelberg are arguably related only because they are  
10:37:29 10 derived from the '623 patent. The accused infringing software,  
10:37:32 11 other evidence, and witnesses are all different and unique to  
10:37:35 12 the actions against Kodak and Heidelberg. Because  
10:37:38 13 plaintiff's --

10:37:38 14 THE COURT: Tell me where you're going with this.

10:37:41 15 MS. FROST: Your Honor, if you try to bring in or we  
10:37:44 16 try to bring in Broadcom or TI or whomever, they will be  
10:37:48 17 misjoined in a case with CSR. CSR will move to sever or to  
10:37:54 18 have a separate trial and have a CSR-only case. And the law I  
10:38:00 19 submit is clear. We don't have to rely on the America Invents  
10:38:03 20 Act, although it certainly accords with it. Existing Rule 20  
10:38:07 21 law will make a combined case with a CSR, Broadcom, and TI  
10:38:13 22 product in the same case improper. And Rule 21 will support a  
10:38:20 23 motion for severance and separate trial of those cases.

10:38:24 24 THE COURT: I understand that. When I talk about  
10:38:31 25 combining things, believe me, that does not mean we just have

10:38:35 1 to have one trial. But I am more concerned at this point,  
10:38:38 2 because I see most of what we discussed several months ago has  
10:38:46 3 now become less enticing to everyone. And that if we attempted  
10:38:57 4 to have a suppliers-first system, then I have not accomplished  
10:39:04 5 anything if we go that way, because I'm going to have a whole  
10:39:07 6 series of motions that have been described by not only other  
10:39:11 7 defendants but you as intervenor.

10:39:13 8           So it looks like we are -- nobody has offered me a  
10:39:16 9 better solution. Where am I wrong? Am I now back to looking  
10:39:22 10 at the 593 case and looking at the 593 case alone and worrying  
10:39:27 11 about the 771 case another day?

10:39:31 12           One of these days, perhaps over a drink, I would like  
10:39:34 13 to hear why Bandspeed chose to file one case in the Eastern  
10:39:38 14 District and one case in the Western District. But I don't  
10:39:43 15 need to worry about that right now. If they had both been  
10:39:46 16 filed here in the first instance, I would be a lot further  
10:39:49 17 along with both of these cases than having them split up.

10:39:55 18           But I understand what you're saying about joinder.  
10:40:00 19 So if I'm now discussing with you the 593 case alone, how much  
10:40:07 20 time do you need to get it to trial? And I'm not going to give  
10:40:10 21 you a whole lot, because you both ought to be pretty familiar  
10:40:14 22 with it.

10:40:14 23           MS. FROST: Your Honor, from our standpoint whether  
10:40:16 24 it's a -- and I'll at my own peril here suggest a second  
10:40:24 25 alternative. If it's not the 593 case, I think another case

10:40:28 1 that could proceed with equal dispatch and achieve an awful lot  
10:40:32 2 is a CSR only case going first. So that case could actually go  
10:40:34 3 to trial first. That case would be your chip supplier  
10:40:37 4 solution.

10:40:39 5 The other parties could do whatever they're talking  
10:40:41 6 about that has all this delay in discovery built into it over  
10:40:45 7 here in a second case that would involve other chip suppliers.  
10:40:49 8 But the CSR-only case would in fact resolve I would say  
10:40:53 9 80 percent of the dispute that's in this courtroom right now  
10:40:58 10 currently.

10:40:58 11 It doesn't matter, by the way, and I'm sure the Court  
10:41:01 12 is well aware, the CSR declaratory judgment action covers all  
10:41:05 13 CSR products regardless of whether they have been accused,  
10:41:11 14 regardless of whether the customers who use them are in the  
10:41:13 15 courtroom or not. It covers the waterfront. So it's a very  
10:41:17 16 big dispute resolution device that the Court could use  
10:41:21 17 separately. Use it as the bellwether, if you will, for the  
10:41:23 18 rest of these cases and go ahead and go to trial. And I think  
10:41:26 19 we could get to trial in that case or in the 593 case, either  
10:41:30 20 one, in Q1 of 2013, maybe Q2.

10:41:36 21 THE COURT: I was thinking earlier than that. What  
10:41:38 22 do you need to do to get that case ready to go to trial?

10:41:41 23 MS. FROST: We need regular discovery, Your Honor.

10:41:44 24 THE COURT: Well, how long do you need? I don't want  
10:41:46 25 to hear generalities.

10:41:48 1 MS. FROST: Well --

10:41:48 2 THE COURT: I think we can get it to trial in a year.

10:41:51 3 MS. FROST: And that's pretty much --

10:41:52 4 THE COURT: Or less. Next fall would be what I would  
10:41:54 5 have in mind. And I think you can get all the discovery done  
10:41:58 6 in that period of time. Mr. Goodpastor?

10:42:04 7 MR. GOODPASTOR: Your Honor, we did submit a  
10:42:05 8 scheduling order with the 593 case with the current parties  
10:42:10 9 only. And, basically, it took our scheduling order that we had  
10:42:13 10 proposed last time we were here for that portion and just moved  
10:42:16 11 it back a couple of months. And we ended up hitting the  
10:42:19 12 holiday, so it actually moves it to the first quarter of 2013.

10:42:23 13 A couple of points, though, with the joinder issue, I  
10:42:26 14 think if you decide ultimately you need to have separate trials  
10:42:31 15 with separate IC makers, you can do that. But the discovery is  
10:42:34 16 going to be the same.

10:42:39 17 And so --

10:42:41 18 THE COURT: That's the other thing to discuss, and  
10:42:45 19 you raise it appropriately. But go ahead.

10:42:45 20 MR. GOODPASTOR: And so we're not sure that really  
10:42:47 21 creates a problem that would prevent you from going ahead  
10:42:51 22 according to your original plan.

10:42:53 23 And I'm not sure if the recent revision to the  
10:42:58 24 Patent Act will have any effect on that at all given the nature  
10:43:01 25 of the way those defendants or third parties would be brought

10:43:04 1 in.

10:43:05 2           So we still think, you know, we're ready to go  
10:43:08 3 forward. We have a proposed schedule for a 593 case alone, if  
10:43:11 4 that's the course you want to take. But we also think that you  
10:43:14 5 can proceed down your original course as well.

10:43:17 6           In both cases, though, we're going to have to add new  
10:43:20 7 products and in both cases we're going to have the same issues  
10:43:23 8 about needing discovery to assert claims against CSR as well as  
10:43:27 9 do infringement contentions against CSR. So we're going to  
10:43:32 10 encounter those problems and those discovery issues whether you  
10:43:35 11 go forward with the 593 case alone or you go forward with your  
10:43:39 12 original plan. And I want to make the Court aware of that.

10:43:43 13           But given that additional discovery needed in the 593  
10:43:47 14 case alone and where we are today, we've submitted this new  
10:43:50 15 proposed order. And I think it's essentially in line with what  
10:43:54 16 you suggested, but we knocked it to the first quarter of 2013  
10:43:58 17 because of some holiday issues surrounding different key dates  
10:44:03 18 in the order.

10:44:08 19           THE COURT: Mr. Weaver?

10:44:10 20           MR. WEAVER: Your Honor, I actually think you got it  
10:44:13 21 exactly right when you started out this morning. You should --

10:44:18 22           THE COURT: You're the only one.

10:44:19 23           MR. WEAVER: I actually don't think -- I'll use the,  
10:44:24 24 I guess it was President Nixon's phrase, the silent majority.  
10:44:28 25 I think the vast majority of folks in this room prefer a chip

10:44:33 1 supplier-only trial. Whether as Ms. Frost suggests there would  
10:44:38 2 be potentially two, three, or four chip supplier trials, we  
10:44:43 3 both know that the chance of all of them going to trial reduces  
10:44:49 4 dramatically as you approach the courthouse steps. But that  
10:44:53 5 is -- that is an issue for another day.

10:44:55 6 The issue is what is the most efficient way for this  
10:45:00 7 Court to conduct this case between now and when it eventually  
10:45:05 8 goes to trial. And I submit that the chip supplier-only option  
10:45:08 9 is the most efficient way to do it.

10:45:10 10 The difference in timing I find a little bit  
10:45:14 11 curious. What I heard Ms. Frost say was that we do either a  
10:45:20 12 first quarter or second quarter of 2013 trial. That's what  
10:45:23 13 Mr. Goodpastor just said. And the proposal by the chip  
10:45:26 14 supplier-only model has us doing it in the summer of 2013.  
10:45:31 15 Those sound like a difference without a distinction. We'd be  
10:45:35 16 on the same approximate schedule, discovery would go hand in  
10:45:39 17 hand in both cases for all chip suppliers, and it would be the  
10:45:44 18 most efficient way to dispatch this case.

10:45:46 19 I submit you've got it right as you've currently got  
10:45:50 20 it contemplated.

10:45:53 21 THE COURT: Ms. Frost?

10:45:55 22 MS. FROST: I do have a couple of comments. I do  
10:46:00 23 think that CSR-only case will go much faster than a combined  
10:46:07 24 chip supplier case, even if there are separate trials at the  
10:46:10 25 end, principally because they are going -- there is going to be

10:46:14 1 a very significant amount of delay in bringing in the  
10:46:19 2 additional suppliers.

10:46:20 3           There are going to be multiple -- it will be on an  
10:46:23 4 indemnity basis. It's going to be contract -- on a contract  
10:46:27 5 basis. Each of these different defendants will have to bring  
10:46:30 6 in a supplier based on a particular contract claim that it may  
10:46:35 7 have based on an indemnity agreement under myriad laws of  
10:46:40 8 myriad countries probably that will get before you. Those  
10:46:44 9 defendants who have not -- those suppliers who have not stepped  
10:46:47 10 up to the plate yet -- and it's been a long time -- won't be  
10:46:51 11 here voluntarily. You will have a very arduous motion practice  
10:46:57 12 before you.

10:46:57 13           Those parties, if they are ultimately held in the  
10:47:00 14 case, will want to have another look at the Markman. And I  
10:47:06 15 just see this as getting -- it's getting way off the track  
10:47:10 16 by --

10:47:11 17           THE COURT: No. Here -- but there are ways to do  
10:47:14 18 this. One is to proceed in that fashion and deal with things  
10:47:21 19 as they come along. We can proceed in one case with everything  
10:47:29 20 parallel with the idea that CSR could very well be tried first  
10:47:35 21 and tried alone. I do not need and will not need to engage in  
10:47:39 22 any additional claims construction with regard to getting that  
10:47:43 23 issue to trial. We and my chambers are capable of keeping  
10:47:48 24 track of these things.

10:47:49 25           The most important thing about putting these cases in

10:47:55 1 some way together is to get all of the discovery in a position  
10:47:59 2 where it can be used in any case, whenever it's tried, and we  
10:48:02 3 don't have complaints that somebody didn't get the opportunity  
10:48:05 4 to engage in that discovery. That's why we're having this  
10:48:09 5 conference, is because I can think of a million ways to handle  
10:48:14 6 this case.

10:48:14 7           And so, you know, we've had a lot roadblocks thrown  
10:48:19 8 up here today. But hearing from you, I can figure out ways to  
10:48:23 9 resolve these things. I can handle a motions practice very  
10:48:30 10 easily. There's nothing in the rules that compels me to deal  
10:48:33 11 with a certain motion before I deal with another motion. I can  
10:48:36 12 see what the motions are and I may very well hold some  
10:48:39 13 motions. Just because somebody jumps in and wants to file a  
10:48:47 14 motion for severance or separate trials doesn't mean I have to  
10:48:50 15 rule on it right of way.

10:48:52 16           Just because somebody jumps in and wants to do  
10:48:55 17 additional claims construction, then I can deal with that as we  
10:48:58 18 come along. And if I need to schedule another claims  
10:49:01 19 construction along the way at the same time, you're getting the  
10:49:04 20 discovery you need and we're working toward getting one case to  
10:49:07 21 trial, and if we can combine other cases with that, fine.

10:49:10 22           I don't find this that hard. I find that you have a  
10:49:13 23 lot harder job than I do, and that you need to spend a whole  
10:49:18 24 lot of time and it's hard with a group this large working out  
10:49:21 25 these little nuances. But there's not going to be a perfect

10:49:26 1 solution to this. This is going to be a difficult case for me,  
10:49:29 2 and it's going to be a difficult case for you. And that's just  
10:49:33 3 the world we live in.

10:49:35 4 And what I want to do is get it moved along in a way  
10:49:38 5 that gets it to trial. I'm a lot more concerned about getting  
10:49:43 6 it to trial. I think many of you have heard this speech  
10:49:46 7 before, but we spend as much time trying to out-plead one  
10:49:51 8 another as we do trying a case -- in most cases, more. This  
10:49:57 9 case, if we tried it altogether, if I combined the two cases  
10:50:02 10 and schedule one trial, we do it all at one time. It's still  
10:50:06 11 going to take less time than all of the time y'all are going to  
10:50:10 12 spend filing motions, many of which I can just tell you,  
10:50:13 13 because I've been down the road before, are not going to be  
10:50:16 14 well-taken. But everybody is going to be proud of them, and  
10:50:19 15 their clients are going to be happy with them and we're going  
10:50:22 16 to go that way.

10:50:23 17 So, on the one hand, I'm very moved toward getting  
10:50:27 18 this case moved -- moving as a combined thing because that gets  
10:50:31 19 discovery going. And it gets discovery in a way that it can be  
10:50:36 20 used in every case no matter how much we divide it up later.

10:50:42 21 MS. FROST: I think -- may I respond to one part of  
10:50:44 22 that, Your Honor? I think the discovery that's unique to CSR,  
10:50:48 23 obviously, Bandspeed's already -- as I understand it, Bandspeed  
10:50:53 24 has already done its document production under the Eastern  
10:50:57 25 District rules. So it's got it all locked and loaded over

10:50:59 1 there.

10:50:59 2           The CSR discovery will actually be only unique to CSR  
10:51:03 3 and its customer defendants. It won't be usable by, and I  
10:51:07 4 submit shouldn't be really accessible to, the Broadcoms and the  
10:51:12 5 others because, I mean, obviously this is source code, this is,  
10:51:16 6 you know, very confidential information and proprietary  
10:51:19 7 information and very aggressive competitors.

10:51:22 8           THE COURT: I don't -- that's really easy to do.

10:51:24 9           MS. FROST: Right. But it's out of sync in the  
10:51:27 10 schedule.

10:51:28 11           THE COURT: Yeah. Because it got out of sync when I  
10:51:31 12 got a second case.

10:51:32 13           MS. FROST: I understand.

10:51:33 14           THE COURT: Like I said this is just hard. It's not  
10:51:35 15 going to go on a perfect way. The way to handle this  
10:51:39 16 information that's proprietary is not rely on a protective  
10:51:45 17 order that we provide in our local rules as a default  
10:51:48 18 protective order. Sit down and work out protective orders on  
10:51:52 19 various classes of documents.

10:51:54 20           MS. FROST: Right. Which we'll do.

10:51:55 21           THE COURT: And that can be done. What it may mean  
10:52:00 22 is that y'all have to recognize that this is going to be the  
10:52:06 23 squeaky wheel that's going to need your grease for a year and a  
10:52:11 24 half as opposed to all other case that you have. Maybe I can  
10:52:15 25 help you with your billable hours for 2012, too.

10:52:18 1 MS. FROST: Well, my biggest concern, Your Honor, is  
10:52:20 2 this, is that we're going to get the CSR -- we're ready to go.  
10:52:22 3 You know, we're ready to go get our case set for trial, and we  
10:52:25 4 think we can do it in 12 months. We'll do our discovery with  
10:52:28 5 Bandspeed who has got a head start on us because they've  
10:52:31 6 already done a lot in the Eastern district. But we'll get our  
10:52:35 7 discovery done, and then there will be this -- there will be  
10:52:40 8 this disconnect, there will be all of this activity on the  
10:52:42 9 other side of the case where we're stymied because we can't go  
10:52:45 10 forward with things because that -- this group is now --

10:52:50 11 THE COURT: No.

10:52:52 12 MS. FROST: -- stuck.

10:52:52 13 THE COURT: I can get you to trial. I can give you a  
10:52:55 14 separate trial. That is not a problem with me. I've said  
10:53:00 15 earlier I think the CSR case can go to trial next winter.

10:53:04 16 MS. FROST: Okay.

10:53:05 17 THE COURT: I don't think we have to wait for the  
10:53:06 18 first quarter of 2013. But we might.

10:53:14 19 But here is the deal: Just because if I were to say  
10:53:23 20 I'm going to do a supplier option first and you raise the  
10:53:30 21 question of whether there would be misjoinder doesn't mean that  
10:53:34 22 I can't solve the joinder problems later --

10:53:36 23 MS. FROST: Absolutely.

10:53:38 24 THE COURT: -- and still get you to trial.

10:53:39 25 MS. FROST: Absolutely.

10:53:41 1 THE COURT: I see no reason why we can't get all of  
10:53:43 2 the parties in here and worry about what we're going to do with  
10:53:47 3 them later. I just want everybody that's going to get sued  
10:53:50 4 under these patents and that has a stake in these patents in  
10:53:54 5 front of me so I can deal with it instead of leaving anything  
10:53:58 6 else hanging -- hanging out there.

10:54:00 7 I can tell you and I'll tell the plaintiffs that at  
10:54:04 8 some point you're going to have run your string on new products  
10:54:11 9 you want to bring and I'm not going to care very much about if  
10:54:14 10 you got objections about it later. At some point you have to  
10:54:17 11 say, If we win, we're going to get enough money off of these  
10:54:20 12 products. And that's just the way it's going to be because  
10:54:23 13 that's the way it is.

10:54:25 14 Now, you know, I'm not hearing a whole lot here that  
10:54:28 15 makes me think that you-all are capable of sitting down and  
10:54:34 16 working out an order on this. I've got -- I mean, a schedule  
10:54:38 17 on this. I've got some proposals from the plaintiffs that I  
10:54:42 18 can -- I can start with on this. But it continues to sound to  
10:54:48 19 me like that probably what I need to do is render an order that  
10:54:56 20 allows discovery to go forward. It's not the way I like to do  
10:55:00 21 it, but I'm not a one-size-fits-all guy. And even though this  
10:55:05 22 will be a little bit different than the way I usually handle  
10:55:10 23 patent cases, this is a little bit different than the usual  
10:55:12 24 patent cases that I get.

10:55:14 25 So if I need to carve out and do another Markman

10:55:21 1 after we get everybody in here, I will do that related to those  
10:55:25 2 things and if I need to work out a separate track.

10:55:28 3 But I don't -- the biggest thing I want to avoid in  
10:55:32 4 this case, if I can possibly avoid it, is two separate sets of  
10:55:38 5 discovery being done, because that is really, really  
10:55:43 6 ineffective for you and a nightmare for me. I want everything  
10:55:49 7 that is discovered regarding these patents to be capable of  
10:55:54 8 being used in every case that we may end up trying on it.

10:55:57 9 You know, it's not that hard. You know, we get all  
10:56:01 10 of the discovery done, you either get it settled or we go to  
10:56:05 11 trial. If we need to have several trials, we have several  
10:56:08 12 trials. You know, I could be trying you guys three times or I  
10:56:12 13 could try three felony cases. You know, a trial is a trial as  
10:56:16 14 far as I'm concerned.

10:56:18 15 You came armed with something, Ms. Frost.

10:56:20 16 MS. FROST: I did. A CSR-only proposal so the Court  
10:56:25 17 can see what we had in mind. And it's not -- in terms of  
10:56:27 18 timing, we've got Q1 of 2013, so it's not different terribly  
10:56:33 19 from Bandspeed. But it is a little different and just involves  
10:56:35 20 our case. And on discovery, obviously, you know, what CSR has  
10:56:40 21 will be useful for it and for its customers. I think it's the  
10:56:46 22 Bandspeed discovery that will be the most applicable across the  
10:56:51 23 spectrum of products and parties.

10:57:51 24 THE COURT: Well, we are at a situation where no  
10:58:14 25 matter what I do, we're going to have at least some differing

10:58:20 1 tracks, because I have got to deal with a track -- track that  
10:58:28 2 allows the plaintiff to assert additional infringing products  
10:58:39 3 and the defendants an opportunity to determine whether they  
10:58:42 4 want to implead other chip suppliers. Because that is the only  
10:58:50 5 way to -- that I see to get to a point where we have everybody  
10:58:59 6 in this case that needs to get in this case or that anybody  
10:59:02 7 wants to get in this case.

10:59:04 8           There is no reason why that can't be occurring while  
10:59:11 9 we are proceeding ahead toward a Bandspeed CSR trial. We are  
10:59:22 10 just going to have to combine everything and have it moving in  
10:59:26 11 some parallel nature, which appears to me that I just need to  
10:59:45 12 sit down and come up with an order and just tell you-all what  
10:59:50 13 it is and you have to live with it.

10:59:54 14           I will tell you, Mr. Goodpastor, Mr. Sauer, just at a  
11:00:02 15 quick glance, I don't see a whole lot wrong with Ms. Frost's  
11:00:10 16 proposal in getting CSR to trial. I can always change my mind  
11:00:23 17 about trying it first later as we proceed, but we need to  
11:00:28 18 proceed in this case.

11:00:40 19           For instance, you-all could easily agree on the  
11:00:47 20 protective order and serve initial disclosures. I think  
11:00:58 21 amended pleadings would pretty much take care of itself  
11:01:04 22 because, if I'm going to allow you to amend for the lawsuit as  
11:01:11 23 a whole, then other parties get to amend their responses or  
11:01:18 24 whatever they have without leave.

11:01:33 25           So let me hear from anybody else that wants to talk

11:01:36 1 about this. There is not a consensus conclusion to this.

11:01:43 2 That's why I get paid the little bucks. I will sit down --

11:01:48 3 MR. WEAVER: Your Honor, David Weaver on behalf of

11:01:51 4 RIM. And others can -- can say if they disagree, but

11:01:57 5 Bandspeed's proposal that they submitted to Your Honor for the

11:02:02 6 chip supplier trial, we're fine with the dates that they've

11:02:06 7 proposed in there, at least conceptually, with the exception of

11:02:09 8 the one that I brought to Your Honor's attention, which is the

11:02:12 9 date for us to bring in the chip suppliers from the new

11:02:18 10 products which we said was 30 days rather than 14.

11:02:22 11 THE COURT: Right. Now, which date is that in the

11:02:24 12 order of the schedule that Ms. Frost proposed?

11:02:28 13 MR. WEAVER: So she does not have that date. I guess

11:02:30 14 the closest would be her deadline to amend pleadings. So she's

11:02:40 15 got a date ...

11:02:45 16 THE COURT: Well, that's why I said I'm going to have

11:02:48 17 work out -- neither one of -- none of the three proposals that

11:02:51 18 I have handle everything.

11:03:02 19 Now, let me ask you a question: Under the

11:03:05 20 spreadsheet proposal for a general chip supplier trial, the

11:03:08 21 plaintiff had proposed a week after the scheduling order --

11:03:17 22 now, I want to make sure I understand -- to file their amended

11:03:21 23 complaint. Did you want 30 days after the filing of that

11:03:24 24 amended complaint or 30 days ...

11:03:30 25 MR. WEAVER: After the amended complaint. Yes, Your

11:03:33 1 Honor. That is where we would get the names of the products --  
11:03:36 2 the new accused products.

11:03:37 3 THE COURT: The difference is they had presumed they  
11:03:40 4 would file leave to amend. I'm not going to deal with leave to  
11:03:43 5 amend. I'm going to allow amendments.

11:03:54 6 MR. WEAVER: So it would be 30 days after we got that  
11:03:56 7 amended compliant.

11:03:57 8 THE COURT: Well, I can work that into this.  
11:04:04 9 Ms. Frost, on your proposal with regard to CSR, what did you  
11:04:12 10 anticipate in the way of amended pleadings by February 21st?

11:04:22 11 MS. FROST: I thought if the parties needed to clean  
11:04:24 12 anything up in terms of eliminating affirmative defenses or  
11:04:28 13 adding them or if Bandspeed had any claims they wanted to ask,  
11:04:33 14 for example, we would want to do more discovery on equitable  
11:04:37 15 conduct, for instance, to see if that was something we would  
11:04:39 16 want to add because of the heightened pleading requirements and  
11:04:42 17 the Rule 11 requirements for that.

11:04:44 18 I don't envision this is a product add amendment  
11:04:49 19 because, as I mentioned, all CSR products are at issue  
11:04:52 20 irrespective of that.

11:04:54 21 THE COURT: No. I understand that. But I'm trying  
11:04:56 22 to combine these two things so it works out.

11:04:58 23 MS. FROST: Right. I understand.

11:04:58 24 THE COURT: If the plaintiff were to amend, then we  
11:05:04 25 don't solve the whole amendment problem by giving a

11:05:13 1 February 21st deadline to amend because we're still going to be  
11:05:18 2 involved in fact discovery until August, which means, if I were  
11:05:30 3 to look at this the way you have it, I can assure you I'm still  
11:05:33 4 looking potentially at motions for leave to amend later when  
11:05:37 5 you finish your discovery.

11:05:40 6           So I don't accomplish a whole lot by giving you a  
11:05:44 7 February 21st deadline to cut off amended pleadings. What I do  
11:05:51 8 accomplish is giving -- your all discovery completion date is  
11:06:00 9 not until November 7th. But what I give you is -- give the  
11:06:10 10 plaintiff an opportunity to amend, the defendants an  
11:06:15 11 opportunity to implead other parties and to answer the amended  
11:06:25 12 pleading, and then I still have another round of amended  
11:06:27 13 pleadings somewhere that needs to be worked in.

11:06:30 14           MS. FROST: My proposal, because it's CSR-only,  
11:06:35 15 didn't envision any impleader. So it was really just cleaning  
11:06:39 16 up amendments more than anything else. I thought we -- some of  
11:06:42 17 the stipulated discovery things we talked about in the  
11:06:45 18 CSR-Bandspeed camp that I thought we could probably get to. We  
11:06:50 19 would get comfortable with what we needed generally by then.  
11:06:54 20 But, I mean, obviously, I'm not wedded to that date at all.

11:06:58 21           THE COURT: All right. Anything else from anybody?

11:07:17 22           (No response)

11:07:17 23           THE COURT: All right. Here is what I'm going to  
11:07:19 24 do: I'm going to consolidate the two cases, because that will  
11:07:35 25 put everything together for purposes of discovery. Then I'm

11:07:44 1 going to render a scheduling order that will look similar but  
11:07:50 2 not exactly like any of the proposals that I have. It is far  
11:07:58 3 and away not going to be a perfect scheduling order, but it  
11:08:05 4 will get this thing moving.

11:08:09 5           It is my intention right now, subject to changing  
11:08:15 6 later, to draft that scheduling order in such a manner as it  
11:08:27 7 gets us moving most quickly toward trying Bandspeed and CSR.  
11:08:35 8 So it will probably be a hybrid type of all claims and  
11:08:45 9 supplier-first options, but not perfect.

11:08:54 10           There will be a supplement to that scheduling order  
11:08:58 11 filed after I see who else is brought into the case and when  
11:09:04 12 they answer and what we may need to do with regard to  
11:09:13 13 accommodating those parties on additional claims that need to  
11:09:21 14 be construed and things of that nature. So the scheduling  
11:09:27 15 order, what you need to understand -- and it will be difficult  
11:09:29 16 for you -- will end up with various tentacles going out from it  
11:09:36 17 to do certain things.

11:09:37 18           It will undoubtedly involve us having other  
11:09:44 19 conferences. A couple of you inquired as to whether you can  
11:09:52 20 appear by phone. The reason the answer was no -- and that will  
11:09:54 21 probably continue to be -- is you look at the number of people  
11:09:57 22 you have in this room. We're likely to have some more. Maybe  
11:10:00 23 we'll lose a few if there are additional settlements. But we  
11:10:07 24 end up taxing the limited electronic abilities that the  
11:10:18 25 Judicial Branch has due to the actions of the Legislative

11:10:23 1 Branch, and so it will just be necessary to probably get you  
11:10:28 2 all in here.

11:10:30 3 I will say this, as I have said before: I realize  
11:10:35 4 it's hard for a lot of lawyers and your clients to understand  
11:10:39 5 this. But when we have a conference, I can get by with one  
11:10:46 6 lawyer to a party. If you want to have additional lawyers to a  
11:10:50 7 party, that's fine. I'm not excluding that. But when your  
11:10:55 8 clients inquire as to why do we have to have two lawyers  
11:10:58 9 there? Why can't some of them be on the phone? The reason  
11:11:02 10 that I can't have some of them on the phone is because of our  
11:11:05 11 capabilities here. So if you want to send four lawyers, you're  
11:11:09 12 welcome to. If you only want to send one to the conferences,  
11:11:13 13 you can. So take that back to your general counsels and your  
11:11:16 14 clients.

11:11:17 15 But it's my intention that, because of the size of  
11:11:21 16 this case, we're going to have all of our conferences done like  
11:11:27 17 we did today, because if I allow one of you the opportunity to  
11:11:31 18 appear by phone, I have to allow all of you the opportunity to  
11:11:35 19 appear by phone. And that's what I can't get to with the size  
11:11:39 20 like this.

11:11:39 21 I'm sure that all of you have law firm capabilities  
11:11:47 22 that are better than what we have here. Someday you will start  
11:11:51 23 having these hearings in somebody's office, and then everybody  
11:11:55 24 can appear by phone. But we can't do it here.

11:11:58 25 So is there anything that anyone wants to say while

11:12:00 1 I've got you all here together? If not, I will get out an  
11:12:07 2 order. Some will like it, some will not, or perhaps all of you  
11:12:11 3 will not. But it will at least get us moving, and it will  
11:12:14 4 consolidate the cases and it will set an overall scheduling  
11:12:18 5 order and it will incorporate, at least in this first instance,  
11:12:22 6 the idea that Bandspeed and CSR will go to trial first at this  
11:12:27 7 point.

11:12:27 8 So that's where we're headed. Everybody be safe over  
11:12:34 9 the holidays. It was good seeing you here today, and we'll  
11:12:38 10 move forward. So at this time, the Court's in recess.
